About us

We are a manufacturer of a large array of high-quality organic and chemical pesticides, fungicides, herbicides, and plant growth regulators that assist cultivators in achieving the optimum farm yields they desire.

Our R&D department continuously develops and generates data in collaboration with various government-approved laboratories, both domestically and internationally, for our specialized formulations.

We are committed to maintaining industry standards, worker welfare, and best practices for pollution-free production, ensuring that our products are environmentally safe and secure.

AIM

“To help farmers grow more food on less land by providing high-quality organic and chemical pesticides, fungicides, herbicides, and plant growth promoters, protecting crops from pests, and increasing productivity per hectare.”

VISION

Our sacred vision is to provide quality pesticides for plant protection, assist farmers in finding appropriate solutions to their problems, and promote the optimal use of agricultural inputs.

Our ultimate aim is to increase agricultural output, help farmers prosper, and enable them to contribute to the nation's economy.
